COST-EFFECTIVE CLOUD DATA SOLUTIONS

Snowflake is an industry leader, offering secure, scalable and cost-effective cloud data platforms and SaaS solutions. Snowflake's cloud data warehousing solution provides three core functions: database storage, query processing and cloud services. But implementing data cloud technology requires expertise; that's where 7T can help.

IMPLEMENTATION AND CONSULTING

As certified Snowflake Partners, 7T's cloud data experts will evaluate your needs and technology infrastructure—whether you're adding to existing technology or developing a custom software platform. We'll develop a winning Snowflake data lake implementation plan to serve you today and into the future.

CONFIGURATION AND MIGRATION

Once 7T's SnowPro Certified Architects have identified the best Snowflake Cloud Data Platform solutions for your needs, we'll configure your cloud data architecture and oversee the data migration process. We ensure data is successfully migrated to your new cloud environment, while adding scalability, performance and operational efficiencies.

DEPLOYMENT AND SUPPORT

Our team will oversee your Snowflake deployment from start to finish, leaving you to focus on whatever you do best. Our cloud data warehouse experts minimize disruption to your business. We offer support to ensure your transition to Snowflake technology is a smooth one. What's more, we can provide ongoing support if any issues arise down the road.
